

Flügger Jumbo Brush High Finish 1139 - FSC

Flügger Pro are handmade quality brushes for the professional painter. The brushes have an ergonomic, natural wood handle. High end fibres ensure hiding power and a perfect finish.

Product properties

Jumbobrush with high finish fibres and an ergonomic short FSC-certified beechwood handle. Extra fine and soft brush fibres equal maximum hiding power and perfect finish. Suitable for corners, edges, larger items. Fully vulcanised brush head and stainless steel ferrule protect against water penetration, prevent discolouration and provide long life.

- Extra fine and soft brush fibres
- FSC-certified beechwood
- Jumbo brush

Product use

Painting of walls, ceilings, pipes, panels, casings and frames. Rinse the brush in water before use and work thoroughly into the paint. Store the brush in airtight packaging when not in use and avoid storing the brush in water.

Cleaning and Maintenance

Clean brushes using Fluren 59. Brush cleaner, Fluren 37 Basic cleaner or liquid soap. For non-aqueous paints, mineral turpentine can be used instead.

Useful Information

Disposal: Remove as much paint as possible from brushes before they are disposed of as small combustible waste.

Good practice

Remove as much paint as possible from tools before cleaning. Do not pour liquid paint residue or cleaning fluid down drains. Clean the paint residue from the brushes right up under the ferrule. Paint residue under the ferrule and between fibres will coagulate and result in brittle bristles. Avoid loading the brushes during drying and store the brush dry.

Please note!

Avoid using High Finish brushes for rough, structured surfaces as this will shorten the life of the brush.

Supplementary Info

FSC is the world's most ambitious global certification for responsible forestry and your safety for wood and paper from well-managed forests and other responsible sources. FSC works for both nature and human conditions in the world's forest areas. Together, we can curb climate change and secure forests full of life for future generations. Through forest certification, FSC helps to ensure good conditions for biodiversity, the aquatic environment, indigenous peoples and forest workers around the world, as well as to spread democracy and education locally. At the same time, the FSC ensures that the forest area is the same generation after generation and prevents deforestation. This means that the FSC contributes to 14 of the UN's 17 world goals and the green transition.
