

# Prof. Facade Brush 7000

## Properties

Facade brush with an ergonomic wood handle. Non-drop brush fibres that minimise splashing and distribute the paint efficiently. Brush head that allows variation from narrow to wide trimming. Suitable for treatment of unbroken surfaces.

## Use

For painting and varnishing of doors, furniture and fixtures. Rinse the brush in water before use and work thoroughly into the paint. Store the brush in airtight packaging when not in use and avoid storing the brush in water.

## Cleaning and Maintenance

Clean brushes using Brush cleaner, Basic cleaner or liquid soap. For non-aqueous paints, White spirit can be used instead.

## Usefull Information

Disposal: Remove as much paint as possible from brushes before they are disposed of as small, combustible waste items.

## Good practise

Remove as much paint as possible from tools before cleaning. Do not pour liquid paint residue or cleaning fluid down drains. Clean the paint residue from the brushes right up under the ferrule. Paint residue under the ferrule and between fibres will coagulate and result in brittle bristles. Avoid straining the bristles during drying and store the brush dry.

## Please note!

Avoid using Stiwex Prof brushes for rough, structured surfaces as this will shorten the life of the brush.

## Technical Data

Produkttype

Brushes

Brush

Non-drop

Shaft

Wood

Available Sizes

50 mm; 75 mm; 100 mm; 120 mm

Metal type

Stainless steel
